login.php

login.php was converted from login.html. The form checks the email format and the 8-20 character password rule.

1. login.php - rendered page (empty form)

2. login.php - form validation: invalid email and password shorter than 8 characters

register.php

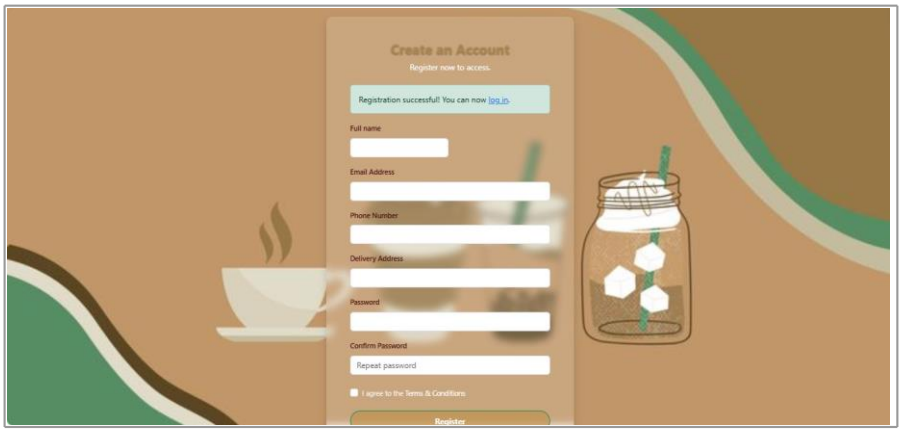

3. register.php - form validation: invalid email, phone, password length and unchecked Terms

4. register.php - valid details entered in every field

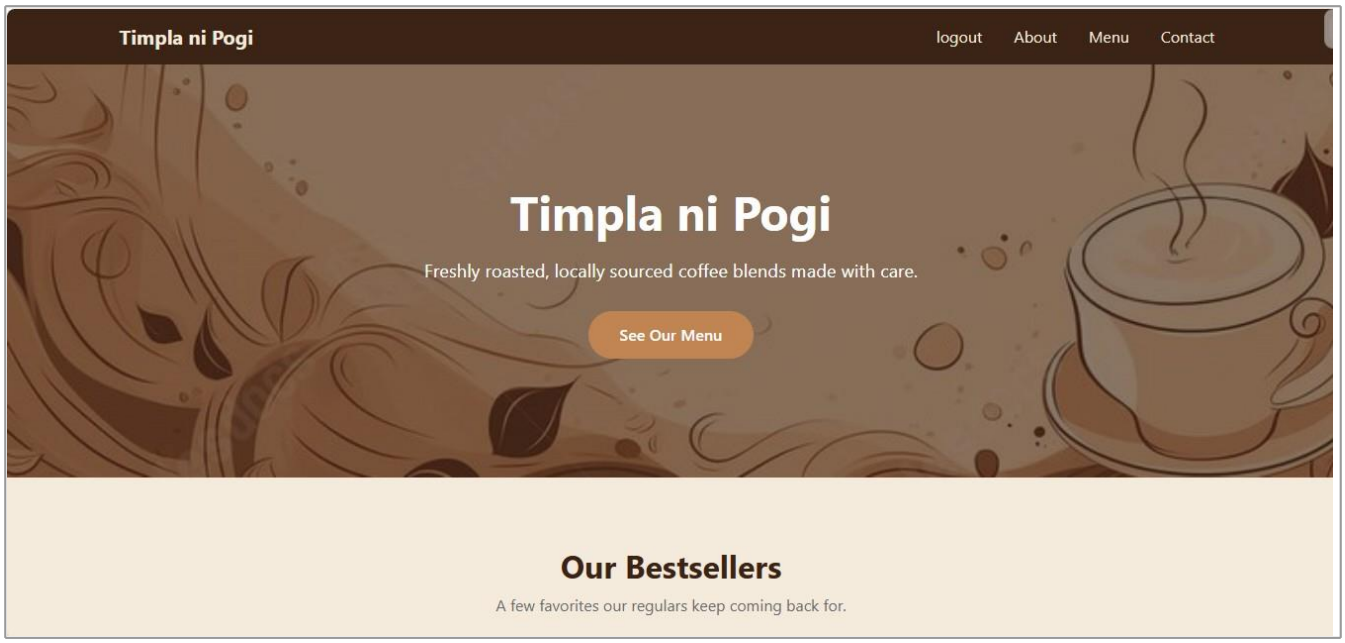

5. register.php - after clicking Register: success message is displayed

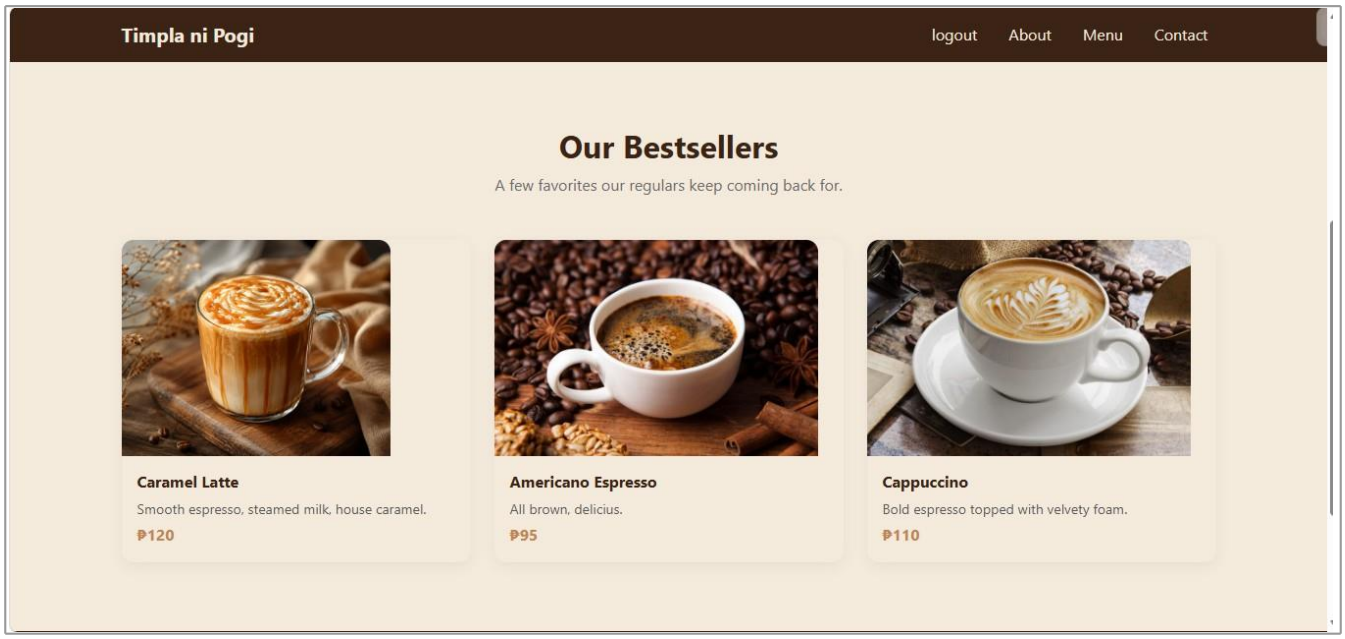

index.php (assembled from include files)

All sections load correctly when index.php is opened on the local PHP server (XAMPP).

6. index.php - navigation bar and hero section (navbar.php + hero.php)

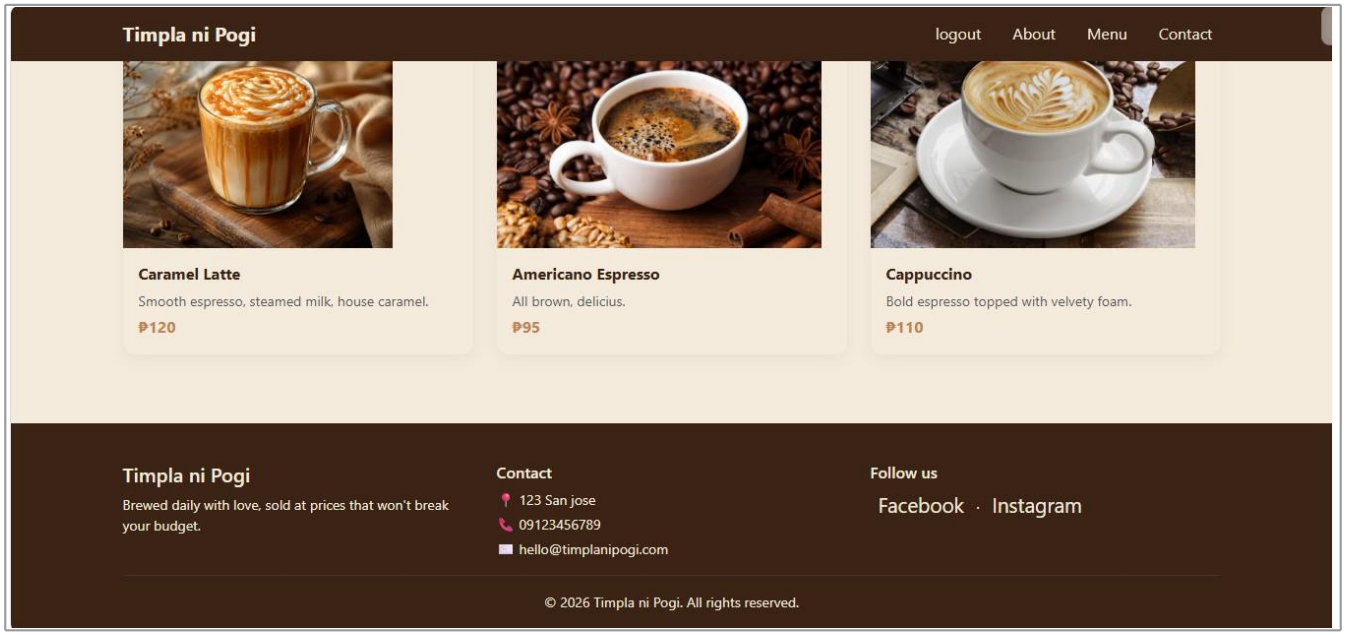

7. index.php - main content / Our Bestsellers (menu.php)

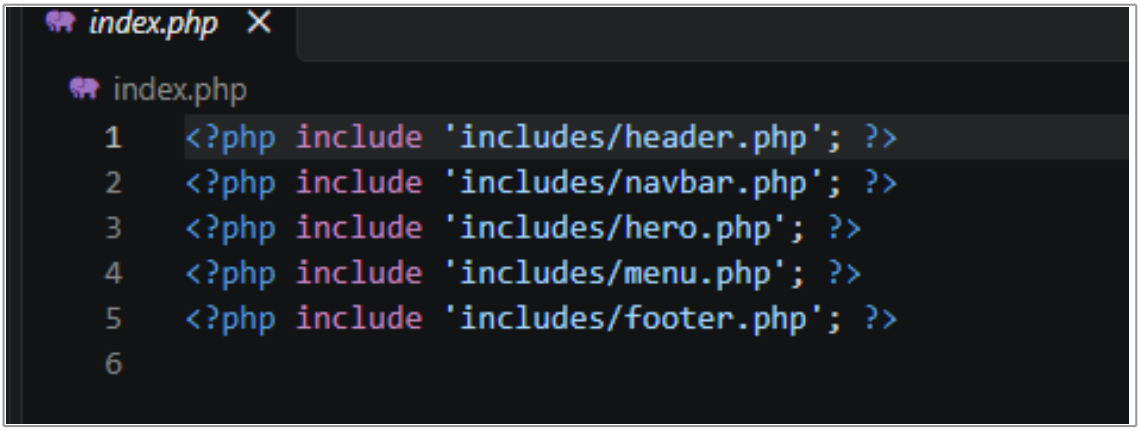

index.php

8. index.php - footer section (footer.php)

Code: main file and header/hero

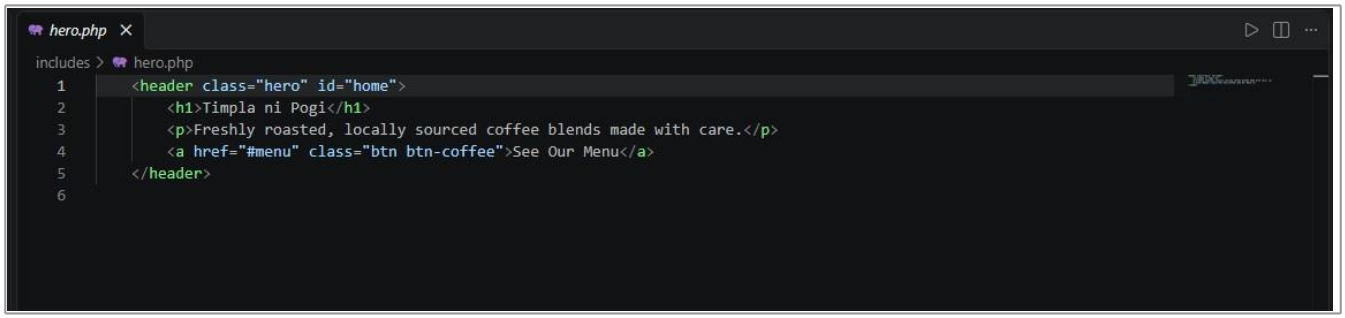

9. index.php - contains only include statements for each section

10. includes/header.php - document head and opening body tag

11. includes/hero.php - hero section

Code: navbar and footer

12. includes/navbar.php - navigation section

navbar.php

includes > navbar.php

```php
<nav class="navbar navbar-expand-lg sticky-top" aria-label="Main navigation">
    <div class="container">
        <a class="navbar-brand fw-bold" href="#home">Timpla ni Pogi</a>
        <button class="navbar-toggler" type="button" data-bs-toggle="collapse" data-bs-target="#navMenu"
            aria-controls="navMenu" aria-expanded="false" aria-label="Toggle navigation">
            <span class="navbar-toggler-icon"></span>
        </button>
        <div class="collapse navbar-collapse justify-content-end" id="navMenu">
            <ul class="navbar-nav gap-lg-3">
                <li class="nav-item"><a class="nav-link" href="login.php">logout</a></li>
                <li class="nav-item"><a class="nav-link" href="">About</a></li>
                <li class="nav-item"><a class="nav-link" href="#menu">Menu</a></li>
                <li class="nav-item"><a class="nav-link" href="#contact">Contact</a></li>
            </ul>
        </div>
    </div>
</nav>

```

13. includes/footer.php - footer section

footer.php

includes > footer.php

```php
    <footer id="contact">
        <div class="container">
            <div class="row gy-4">
                <div class="col-md-4">
                    <h5>Timpla ni Pogi</h5>
                    <p class="small mb-0">Brewed daily with love, sold at prices that won't break your budget.</p>
                </div>
                <div class="col-md-4">
                    <h6>Contact</h6>
                    <p class="small mb-1">📍 123 San jose</p>
                    <p class="small mb-1">📞 09123456789</p>
                    <p class="small mb-0">✉️ hello@timplanipogi.com</p>
                </div>
                <div class="col-md-4">
                    <h6>Follow us</h6>
                    <div class="social-icons">
                        <a href="#" aria-label="Facebook">Facebook</a> ·
                        <a href="#" aria-label="Instagram">Instagram</a>
                    </div>
                </div>
            </div>
            <hr class="border-secondary my-3">
            <p class="small text-center mb-0">&copy; 2026 Timpla ni Pogi. All rights reserved.</p>
        </div>
    </footer>

    <script src="https://cdn.jsdelivr.net/npm/bootstrap@5.3.3/dist/js/bootstrap.bundle.min.js"></script>
</body>

</html>

```

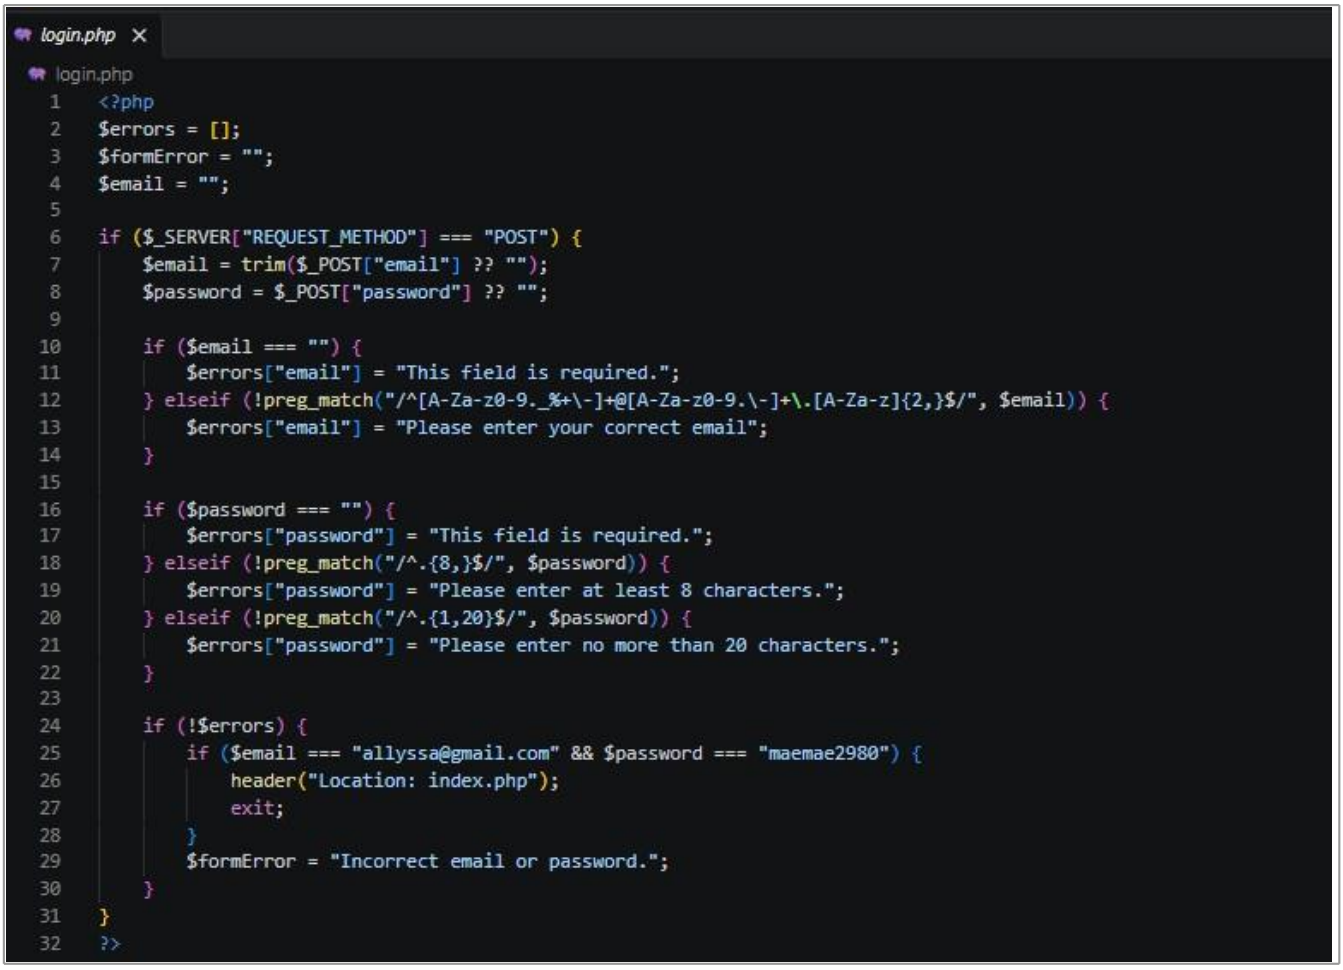

Code: menu

14. includes/menu.php - main content section

Code: login.php validation

15. login.php - PHP validation using regular expressions (preg_match)

```php
<?php
$errors = [];
$formError = "";
$email = "";

if ($_SERVER["REQUEST_METHOD"] === "POST") {
    $email = trim($_POST["email"] ?? "");
    $password = $_POST["password"] ?? "";

    if ($email === "") {
        $errors["email"] = "This field is required.";
    } elseif (!preg_match("/^[A-Za-z0-9._%+\-]+@[A-Za-z0-9.\-]+\.[A-Za-z]{2,}$/", $email)) {
        $errors["email"] = "Please enter your correct email";
    }

    if ($password === "") {
        $errors["password"] = "This field is required.";
    } elseif (!preg_match("/^.{8,}$/", $password)) {
        $errors["password"] = "Please enter at least 8 characters.";
    } elseif (!preg_match("/^.{1,20}$/", $password)) {
        $errors["password"] = "Please enter no more than 20 characters.";
    }

    if (!$errors) {
        if ($email === "allyssa@gmail.com" && $password === "maemae2980") {
            header("Location: index.php");
            exit;
        }
        $formError = "Incorrect email or password.";
    }
}
?>
```

Code: register.php validation (1/2)

16. register.php - PHP validation using regular expressions: full name, email, phone, address

register.php

```php
<?php
$errors = [];
$success = false;
$old = ["fullname" => "", "email" => "", "phone" => "", "address" => ""];

if ($_SERVER["REQUEST_METHOD"] === "POST") {
    foreach ($old as $key => $v) {
        $old[$key] = trim($_POST[$key] ?? "");
    }
    $password = $_POST["password"] ?? "";
    $confirmPassword = $_POST["confirmPassword"] ?? "";

    if ($old["fullname"] === "") {
        $errors["fullname"] = "This field is required.";
    } elseif (!preg_match("/^[A-Za-z]+(?:[ .'\-][A-Za-z]+)*$/", $old["fullname"])) {
        $errors["fullname"] = "Only letters and spaces allowed";
    }

    if ($old["email"] === "") {
        $errors["email"] = "This field is required.";
    } elseif (!preg_match("/^[A-Za-z0-9._%+\-]+@[A-Za-z0-9.\-]+\.[A-Za-z]{2,}$/", $old["email"])) {
        $errors["email"] = "Please enter a valid email address.";
    }

    if ($old["phone"] === "") {
        $errors["phone"] = "Please enter your phone number";
    } elseif (!preg_match("/^\d+$/", $old["phone"])) {
        $errors["phone"] = "Please put your correct phone number";
    }

    if ($old["address"] === "") {
        $errors["address"] = "This field is required.";
    }

```

Code: register.php validation (2/2)

17. register.php - password, confirm password, terms checkbox and error display function

register.php

```php
if ($_SERVER["REQUEST_METHOD"] === "POST") {

    if ($password === "") {
        $errors["password"] = "Please enter your password";
    } elseif (!preg_match("/^.{8,}$/", $password)) {
        $errors["password"] = "Password must be at least 8 characters";
    } elseif (!preg_match("/^.{1,20}$/", $password)) {
        $errors["password"] = "Password must be at most 20 characters";
    }

    if ($confirmPassword === "") {
        $errors["confirmPassword"] = "Please confirm your password";
    } elseif (!preg_match("/^.{8,}$/", $confirmPassword)) {
        $errors["confirmPassword"] = "Password must be at least 8 characters";
    } elseif (!preg_match("/^.{1,20}$/", $confirmPassword)) {
        $errors["confirmPassword"] = "Password must be at most 20 characters";
    } elseif ($confirmPassword !== $password) {
        $errors["confirmPassword"] = "Try the password again";
    }

    if (empty($_POST["termsCheck"])) {
        $errors["termsCheck"] = "This field is required.";
    }

    if (!$errors) {
        $success = true;
        $old = ["fullname" => "", "email" => "", "phone" => "", "address" => ""];
    }
}

function showError($errors, $key)
{
    if (isset($errors[$key])) {
        echo '<label class="error">' . htmlspecialchars($errors[$key]) . '</label>';
    }
}
?>
```
